

Why We Recommend Desexing Your Dog

Advantages of Spaying Your Female Dog

- No unwanted litters of puppies
- No male dogs turning up at your property
- Elimination of mammary tumours later in life
- No bloody discharge when in season
- Reduced incidence of some diseases (such as diabetes and epilepsy) developing later in life

Advantages of Castrating Your Male Dog

- Decreased territory marking (urine marking)
- Reduced unwanted litters of puppies
- Reduced wandering which results in less chance of being hit by a car
- Reduced fighting with other dogs
- Reduced incidence of prostate disease in later years
