

# Why we recommend de-sexing your cat

If you are not breeding from your cat we recommend having them desexed for many different reasons:

## Advantages of Speying Your Female Cat:

- No unwanted litters of kittens
- No yowling at night when she calls to local tom cats
- No cat fights when toms gather to compete for her affections

## Advantages of Castrating Your Tom Cat:

- Decreased territory marking/urine spraying around the home
- Reduced unwanted litters of kittens
- Reduced wandering which results in less abscesses from fighting, less chance of being hit by a car, and less chance of contracting several incurable viral diseases including Feline Leukaemia virus and Feline Immunodeficiency Virus (FIV).
