

New Kitten Owners Check List

"I'm your new kitten"

Thank you for letting me become, part of your family.

Here are a few things that you need to provide for me to ensure I am a happy and healthy kitten."

- Once you get me home I will need treating for fleas. And again at 8 weeks old.
- I need **vaccinating** – first when I am 8 weeks old and then a booster when I am 12 weeks old.
- Then once a year I need to go to the vet for my annual vaccination and health check up.
- When I am two weeks old you need to start worming me with "Endogard" once every two weeks until I am three months old. Kittens will need to be weighed and the tablet split for the correct weight, or Milbemax cat.
- When I am three months old I need to be wormed with "Endogard" once a month until I am six months old.
- When I am six months old I will need to be wormed once every three months for the rest of my life.
- I need to have access to **drinking water** at all times.
- I need **nutritious, kitten specific food** until I am 1 year old, and I need to be **fed regularly** during the day.
- I need to be **de-sexed** at 5-6 months old to prevent unwanted pregnancies.
- I need at least 2 **litter trays** and plenty of cat litter.
- I need a selection of **toys** to keep me occupied.
- I need a sturdy **scratching pole** or cat climbing tree.
- I need a nice **warm, comfortable bed** that I can call **my own**.

Most of all I NEED YOU!
